

I'm a Full Stack developer with 4+ years turning ideas into real software. I care deeply about writing clean code that others can understand and maintain — not just code that works today, but scales tomorrow. I work with Clean Architecture and DDD because I believe structure matters as much as functionality. I learn fast, adapt better, and enjoy both backend and frontend equally.

01 Experience

Jan 2024 **Full Stack Developer | Founder**

— Inversiones Olympos · Santa Rosa de Copán, Honduras

Present

- › Full Stack development focused on performance, Clean Architecture and DDD in production systems.
- › CI/CD implementation, automated testing, security auditing and database optimization.
- › Agile project management with multidisciplinary teams.

Jan 2022 **Software Developer**

— DIPROMA · Santa Rosa de Copán, Honduras

Dec 2023

- › Development and maintenance of internal systems for administrative and operational process management.
- › Reporting modules, workflow automation and migration of manual processes to digital solutions.
- › Technical support and documentation of legacy systems under agile methodologies.

04 Skills
